

TOP 10

reasons why businesses trust cleanDocs for data protection

1

2-in-1 solution

Metadata cleaning and email recipient checking in a single application that is easy to use and configure.

2

Speed

Remove more than 100 metadata types from files in milliseconds with no impact on end-user productivity.

3

Accuracy

Clean sensitive metadata from supported files every time, including zipped and password-protected files.

4

Corporate policies

Enforce default metadata cleaning policies for every email to ensure compliance with enterprise policies.

5

Flexible

Give users the ability to make decisions at the point of sending based on the recipient's trust level.

6

Integration

Out-of-the-box integration with Microsoft Office and leading document management systems for improved workflows.

7

Comprehensive

Use the desktop solution on its own, or with cleanDocs Server to protect emails sent from mobile devices and Outlook Web Access.

8

Easy configuration

The Graphical Configuration Manager lets you set cleaning and email recipient checking policies at the user level.

9

Simple UI

A deliberately simple UI means users can get up to speed quickly with minimal training required.

10

Time saving

Enable advanced output options to convert attachments to PDF, add to a ZIP file, or apply password protection.
